Technical Skills

Languages: Java, Python, C, SQL, JavaScript

Frontend Technologies: HTML, CSS, Bootstrap, React.js, Tailwind CSS

Backend Technologies: Node.js, Express.js, Python

Databases: PostgreSQL (SQL), MongoDB (NoSQL)

Tools and Engineering Concepts: Git, RESTful API Design, API Testing, Authentication and Authorization, JSON and HTTP, Data Structures and Algorithms, CRUD Operations, Error Handling and Debugging, AJAX, Basic Artificial Intelligence, UI and UX Design Principles

Internship

Full Stack Development Intern (Training)

June 2025

AXEXA Technology Solution

Coimbatore

- Completed a structured internship training program covering frontend, backend, and database concepts across multiple guided exercises.
- Gained hands-on exposure to frontend and backend workflows, including application structure and feature implementation.
- Strengthened understanding of real-world product development practices through mentorship and project-based learning.

Education

Adithya Institute of Technology

Coimbatore, TN

Bachelor of Engineering in Computer Science (CGPA: 7.8)

Sep 2022 – Apr 2026

Government Model School

Perambalur, TN

Intermediate MPC

Jun 2020 – May 2022

Projects

Vidiyal – Public Safety and Responsible Consumption Monitoring Platform

Ongoing

- Developed a MERN-based web application to promote responsible alcohol consumption and improve public safety through digital purchase tracking and consumption monitoring.
- Implemented OTP-based login, age verification, QR code scanning, and purchase history tracking to prevent underage access and maintain secure records.
- Built user and admin dashboards to display spending reports, consumption trends, warning notifications, and area-wise analytics for better decision-making and self-improvement.
- Technologies: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, PWA, JWT, QR Scanner (html5-qrcode), Recharts, REST APIs.

GroPILOT - Grocery Shop

Sep 2025

- Designed and developed an end-to-end grocery e-commerce platform using the MERN stack with product catalog, cart, checkout, and order management features..
- Implemented a seller dashboard for managing products, inventory, and orders, enabling role-based access for sellers and users.
- Integrated secure payment processing using Razorpay, supporting seamless transactions and order confirmation workflows.
- Built RESTful APIs and JWT-based authentication to manage users, sellers, products, and orders efficiently.
- Technologies Used: MongoDB, Express.js, React.js, Node.js, Razorpay, JWT Authentication, REST APIs, HTML, CSS, JavaScript

Subscription Tracker Backend System

Oct 2025

- Developed a backend system to manage multiple subscription plans and automated renewal workflows.
- Integrated automatic renewal calculations and scheduled email reminders using background workflows.
- Secured REST APIs with rate limiting and bot protection, emphasizing reliability and error handling.
- Technologies Used: Node.js, Express.js, MongoDB, Node Mailer, Upstash Workflow, Arcjet, HTTPie.

Achievements

MindMate — Idea Selected, NxtWave Buildathon X OpenAI Academy

Nov 2025

NxtWave Buildathon X OpenAI Academy

Chennai

- Proposed an AI-based mental wellness solution with mood tracking and support features; selected at the state level for innovation and practical application.

Certifications

Industry-Ready Certification Program

Aug 2022 – Ongoing

Full Stack Development (CCBP 4.0)

Hyderabad

- Completed a 4-year industry-focused full-stack development program covering frontend, backend, databases, and core programming concepts.
- Built static, responsive, and dynamic web applications using HTML, CSS, Bootstrap, JavaScript, and React.js.
- Gained strong programming foundations in Python, including problem-solving and logical thinking.
- Learned database concepts and SQL for data modeling and querying.
- Developed backend applications using Node.js and Express, including routing, APIs, and database integration.
- Acquired hands-on experience with Git, GitHub, command-line tools, and fundamentals of operating systems and networking. Introduced to Data Structures and Algorithms, covering basic and intermediate concepts for problem-solving.
