## Technical Skills

---

**Programming Languages:** Java, Python, SQL, JavaScript(JSX)  
**Frontend & Backend:** React, Tailwind CSS, Node.js, Express.js, REST APIs  
**Database & Caching:** PostgreSQL, MongoDB, Query Optimization, Indexing, Redis(Basic)  
**Cloud & Version Control & Testing:** AWS(EC2, S3), Git, Github, Postman(API Testing)  
**Core Concept:** Operating Systems, Computer Networks, System Design, Agile/Scrum

## Internship

---

### **AXEXA Technology Solution | Certificate**

June 2025

*Full Stack Development Intern (Training)*

*Coimbatore*

- Completed a structured internship training program covering frontend, backend, and database concepts across multiple guided exercises.
- Gained hands-on exposure to frontend and backend workflows, including application structure and feature implementation.
- Strengthened understanding of real-world product development practices through mentorship and project-based learning.

## Education

---

### **Adithya Institute of Technology**

Coimbatore, TN

*Bachelor of Engineering in Computer Science (CGPA: 7.36)*

*Sep 2022 – June 2026*

### **Government Model School**

Perambalur, TN

*Intermediate MPC*

*Jun 2020 – May 2022*

## Projects

---

### **Vidiyal – Public Safety & Health Awareness Platform | Live Demo**    Ongoing (Frontend Completed)

- Designed and developing a **full-stack public safety platform** consisting of a **React Native (Expo)** mobile application for citizens and a **React.js** web dashboard for administrators.
- Addressed challenges related to **underage alcohol purchases** and **responsible consumption** through digital identity verification, purchase tracking, and consumption monitoring.
- Implemented **DigiLocker-based identity verification**, JWT authentication, QR code scanning, and secure REST APIs to enable authorized access and maintain purchase records.
- Built role-based dashboards providing spending reports, consumption trends, warning notifications, and area-wise analytics using MongoDB and React.js.
- **Technologies:** React Native (Expo), React.js, Node.js, Express.js, MongoDB, NativeWind (Tailwind CSS), JWT Authentication, REST APIs, DigiLocker API (Planned), QR Scanner.

### **GroPILOT – Grocery Shop Platform | Live Demo**

Sep 2025

- Designed and developed an end-to-end grocery e-commerce platform using the MERN stack with product catalog, cart, checkout, and order management features..
- Implemented a seller dashboard for managing products, inventory, and orders, enabling role-based access for sellers and users.
- Integrated secure payment processing using Razorpay, supporting seamless transactions and order confirmation workflows.
- Built RESTful APIs and JWT-based authentication to manage users, sellers, products, and orders efficiently.
- Technologies Used: MongoDB, Express.js, React.js, Node.js, Razorpay, JWT Authentication, REST APIs, HTML, CSS, JavaScript

## Achievements

---

### MindMate | Selection Certificate

Nov 2025

*Idea Selected, NxtWave Buildathon X OpenAI Academy*

*Chennai*

- Proposed an AI-based mental wellness solution with mood tracking and support features; selected at the state level for innovation and practical application.

## Certifications

---

### Industry-Ready Certification Program | Certificate

Aug 2022 – Ongoing

*Full Stack Development (CCBP 4.0)*

*Hyderabad*

- Completed a 4-year industry-focused full-stack development program covering frontend, backend, databases, and core programming concepts.
- Built static, responsive, and dynamic web applications using HTML, CSS, Bootstrap, JavaScript, and React.js.
- Gained strong programming foundations in Python, including problem-solving and logical thinking.
- Learned database concepts and SQL for data modeling and querying.
- Developed backend applications using Node.js and Express, including routing, APIs, and database integration.
- Acquired hands-on experience with Git, GitHub, command-line tools, and fundamentals of operating systems and networking. Introduced to Data Structures and Algorithms, covering basic and intermediate concepts for problem-solving.
